DIVING CENTER

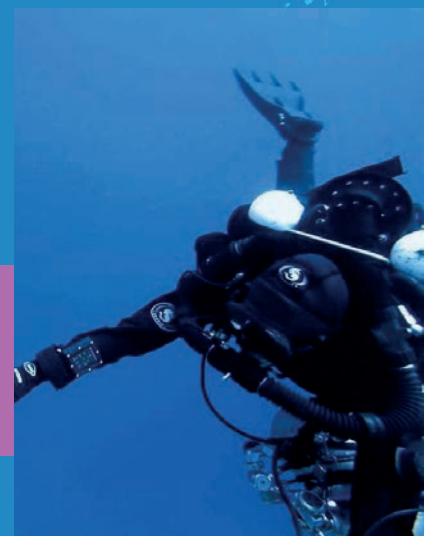

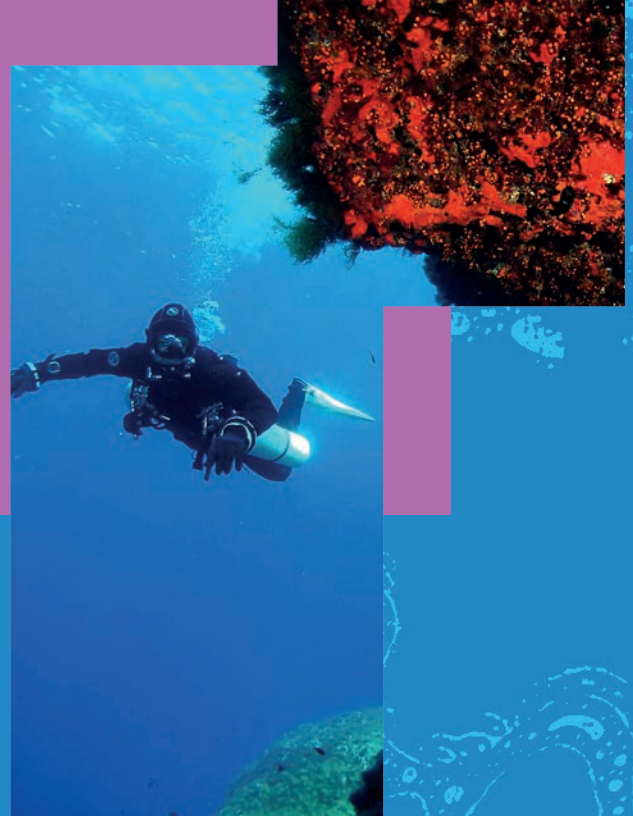

WHAT IS TECHNICAL DIVING:

Technical diving is any type of diving activity that takes place beyond the limits of recreational diving, about time spent under water, greater depths, or addition of specialized equipment that is not usually seen or used in recreational diving. Technical diving allows you to utilize specialized equipment to spend extra time at any depth you want from shallow to beyond 100m!!

You will begin to use different types of equipment configurations from twin tanks, for extra gas supply, to discover the utterly silent world with almost perfect buoyancy. The aim of technical Diving Courses is to make you self – sufficient, to deal with any problems that might occur during any one of your underwater experiences. It is also aimed at giving you knowledge in equipment and theory to be able to safely

PADI TEC COURSES

The DIR system used in the Centre is now considered the most popular and appreciated in the Tech Diving world. What better teaching Padi DSAT courses to acquire all the peculiarities?

D Sheikh Coast

DIVING CENTER

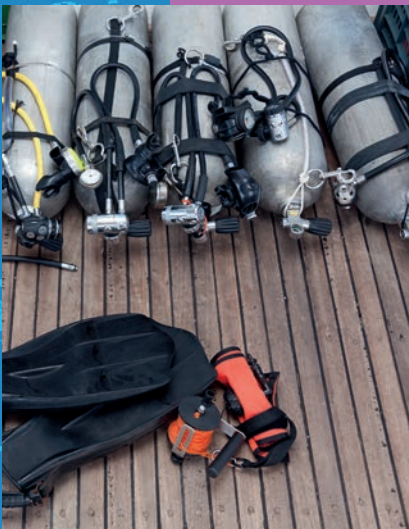

INTRO TO TEC: Consists of one theory part, one session in the water practicing the new skills and one long dive. Designed for divers who want to get experience and develop skills with tec dive equipment configurations while focusing on their buoyancy and trim. This course is also useful for technical divers who may need a refresher or an orientation to a new equipment configuration.

TEC 40 AND TEC 40 TRIMIX: Consist of seven knowledge development sections, four practical application sessions and four training dives. Designed for the diver transitioning from recreational diving to technical diving. Prerequisites: Advanced Open Water, Nitrox and Deep Certified.

TEC 45 AND TEC 45 TRIMIX: Extend your depth limit to 45mt. Learn to plan and execute repetitive decompression dives using a single stage/decompression cylinder. Prerequisite Tec 40 and Rescue Certified.

TEC 50 AND TEC 50 TRIMIX: Make extended range dives up to 50mt. Learn how to make dives with multiple decompression stops, using two deco gases. Prerequisite Tec 45 Certified.

TEC TRIMIX 65: Extend your depth range the right way with a blend of helium, oxygen & nitrogen (Trimix). The Tec Trimix 65 course introduces you to using trimix down to a max depth of 65mt.

TEC TRIMIX DIVER: This course turns experienced tec divers into extreme divers. During this course, you'll make dives as deep as 90mt using multigas Trimix, handling up to 3 stages.

TEC GAS BLENDER: This course teaches you how to blend enriched air Nitrox and helium-based gases using one or more methods.
